What is Emsi Data?

At Emsi we're passionate about providing meaningful labor market data for colleges and their students.

Our labor market dataset includes data from three categories: government sources, online job posting activity, and professional profiles/resumes. This report primarily leverages the laKer, known as our Profile Analytics database, which aggregates social and professional profiles from over 100 public websites.

FAQ

How does Alumni Outcomes work?

Your insﬞtuﬞon provided Emsi with a catalog of your academic programs and student records. We matched these records to our database of profiles and resumés to connect employment outcomes to your graduates so you get detailed, personalized results.

Alumni Outcomes Deliverables:

> Summary: Excel file with match staﬞsﬞcs of overall project

- Data: detailed Excel file with all matched data for graduates, including names and contact informaﬞon, where available
  - Data (non-grad)*: detailed Excel file, for matched non-completers
- Analysis: Excel file with filterable pivot tables for most recent available locaﬞon and employment for matched graduates/program completers (depersonalized)
  - Analysis (non-grad)*: Excel file for matched non-completers (depersonalized)

How does Emsi construct a "profile"?

We consolidate billions of raw social profiles and data points from across the web. This brings back millions of duplicate profiles which we then match and unify to create one unique master profile; this profile corresponds to one real person. We aKempt to match profiles based on known fields like email address, loca: on, name, job : tle, etc. Finally, we export the final profile dataset and make it available to various customer facing applica: ons.

What does Emsi count as a matched record?

Emsi matched your ins: tu: on's past student informa: on to a database containing public profiles. To count as a matched record, a
